Structure & Topics

01

Business context

Stakeholder questions, data, and scope

02

Compensation analytics

Career progression, remote pay, salary trends

03

Executive recommendations

Walmart rationale, target titles, next steps

Building a Sustainable Executive Recruiting Strategy

THE BUSINESS MODEL

- Libeccio earns revenue through successful placements, but sustainable growth depends on delivering qualified candidates and securing repeat business

THE MARKET CHALLENGE

- Technical roles vary widely in compensation, experience requirements, and specialization, making it important to determine where Libeccio should focus its resources.

HIGH DEMAND FOR DATA ENGINEERING

- Identify promising talent segments and as anchor client with long-term demand for specialized technical expertise

Three stakeholder questions guide our recruiting recommendations

- How do salaries differ across Entry, Mid, Senior and Executive levels?
- Is there a measurable remote salary premium or penalty after adjusting for role and experience?
- Where are salaries growing and which roles should we prioritize?

Global AI & Data Salary Survey, 2020-2025

151,445
Original observations

71,913
After exact deduplication

83.6%
U.S.-resident employees

- **Source:** Publicly available, anonymously submitted salary survey from aijobs.net; frozen snapshot dated August 3, 2025.
- **Key Variables**: Reported salary (USD), job title, experience, remote status, employee residence, employer location, company size, and work year.
- **Important Limitation:** Voluntary reporting, no unique respondent IDs, and incomplete 2025 coverage. Records describe compensation, not hiring demand.

Source: Team 4, Enhancing Walmart's Future Technology Leadership (2026), based on aijobs.net dataset (Aug. 3, 2025).

METHODS

Descriptive summaries and regression provide complementary evidence

Clean & Organize

Removed identical records and grouped job titles into six technical specialties using keyword-based rules.

Compare Salaries

Used medians and salary distributions to compare experience levels, specialties, company sizes, and years.

Examine Remote Pay

Used log-linear regression to compare fully remote and on-site salaries while accounting for other factors.

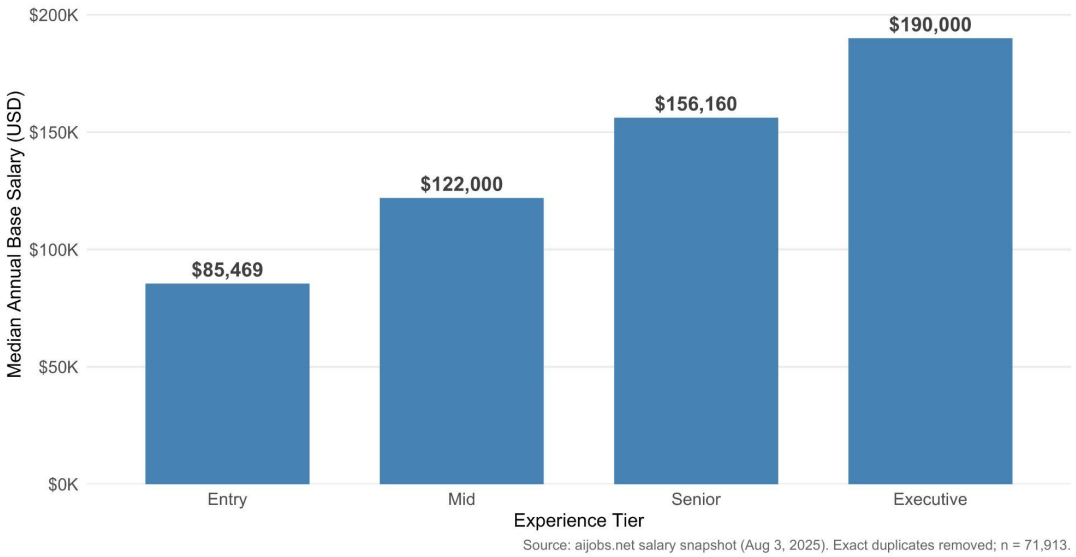

Develop Recommendations

Combined compensation findings with external company research to identify recruiting priorities and evaluate Walmart.

Salaries Rise with Experience

Salaries Rise Substantially With Experience

Median annual reported base salary by experience tier.

Source: aijobs.net salary snapshot (Aug 3, 2025). Exact duplicates removed; n = 71,913.

KEY FINDINGS

Median salaries increase across experience tiers, although the size of the difference varies by technical specialty.

IMPLICATIONS

Prioritize senior and executive talent levels, where higher compensation and specialized experience align with Libeccio's recruiting strategy.

Source: Team 4, Enhancing Walmart's Future Technology Leadership (2026), based on aijobs.net dataset (Aug. 3, 2025).

Career-Tier Pay Gaps Vary Across Technical Specialties

Percentage and dollar differences between median reported salaries at adjacent experience levels

TECHNICAL SPECIALTY	ENTRY → MID	MID → SENIOR	SENIOR → EXECUTIVE
Data Engineering & Architecture	**48.5%** +$38,800	**26.3%** +$31,200	**30.0%** +$45,000
Data Scientist	**36.2%** +$32,001	**32.8%** +$39,549	**18.9%** +$30,250
Software & Platform Engineering	**31.8%** +$34,000	**22.9%** +$32,250	**11.7%** +$20,240
Machine Learning / AI	**28.6%** +$32,900	**24.3%** +$36,000	**10.5%** +$19,350
Data & BI Analyst	**14.2%** +$11,722	**25.3%** +$23,744	**23.0%** +$27,056
Product & Technical Leadership	**17.4%** +$21,534	**18.6%** +$27,090	**18.8%** +$32,425

KEY FINDING

Data Engineering & Architecture has the largest senior-to-executive median pay gap.

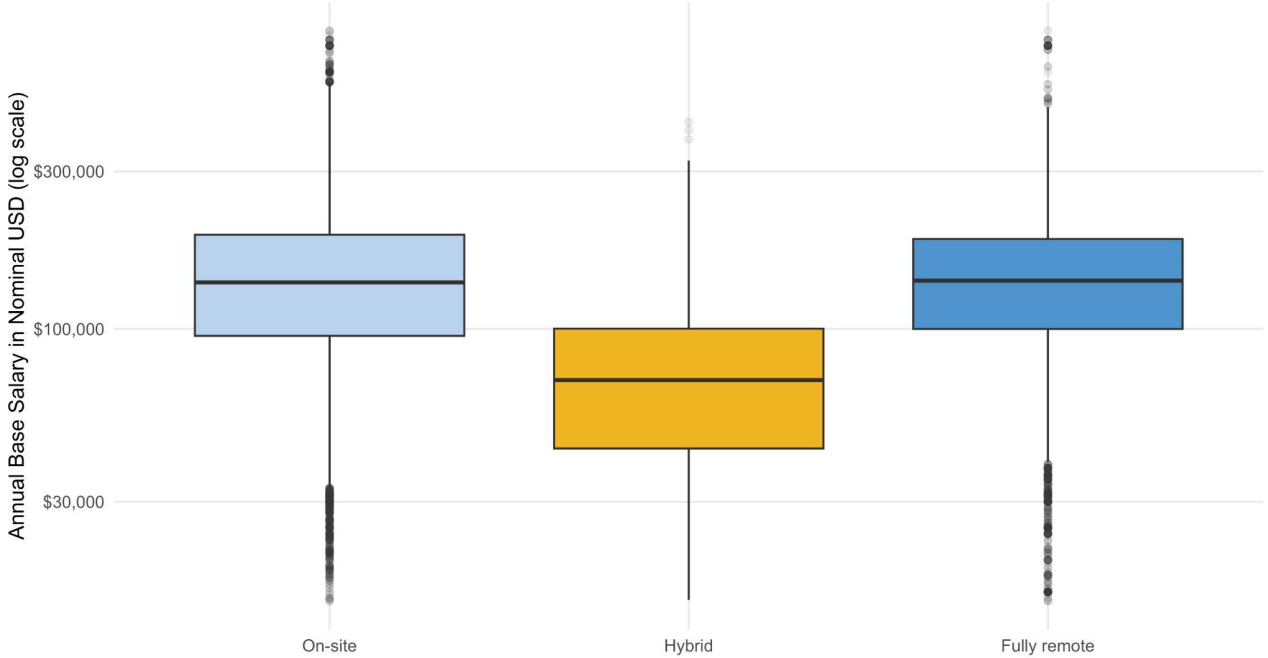

+$45,000
+30.0%

Source: aijobs.net salary survey (Aug. 3, 2025), exact-deduplicated sample. Differences compare separate employee groups, not individual raises.

No Clear Remote Salary Premium After Adjustment

Raw salary distributions overlap across remote work arrangements

Unadjusted comparisons do not control for role mix, seniority, firm size, or work year.

Source: aijobs.net salary snapshot (Aug 3, 2025). Deduplicated sample.

-0.7%

Estimated Salary Difference

p = 0.141

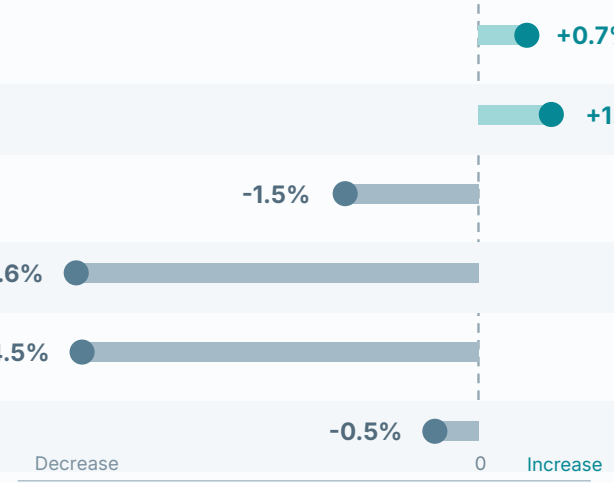

REMOTE VS. ONSITE SALARY ANALYSIS

Do not assume an automatic remote pay premium or discount.

2024 - partial 2025 data suggest strength in AI and Product Leadership

Change in median reported annual salaries: full-year 2024 vs. partial-year 2025 (through August 3)

ROLE FAMILY	2024 MEDIAN	2025 MEDIAN*	CHANGE IN MEDIAN
Machine Learning / AI	$170,721	**$172,000**	+0.7%
Product & Technical Leadership	$163,600	**$165,445**	+1.1%
Software & Platform Engineering	$160,160	$157,713	-1.5%
Data Scientist	$144,200	$137,550	-4.6%
Data Engineering & Architecture	$142,500	$136,025	-4.5%
Data & BI Analyst	$100,000	$99,500	-0.5%

KEY FINDING **Product leadership (+1.1%) and AI (+0.7%) edge higher**

Source: aijobs.net / CMU frozen salary snapshot (Aug. 3, 2025). Exact-deduplicated records; role-family classification replicated from Team Libeccio Quarto analysis.

Three findings from our compensation analysis

01 Compensation rises with experience

Executive median: $190,000 | Entry median: $85,469

2.2×

EXECUTIVE / ENTRY

02 No clear remote salary premium after adjustment

Estimated gap: −0.7% | 95% confidence interval: −1.69% to +0.24%

–0.7%

FULLY REMOTE VS. ON-SITE

03 Recent salary changes vary across specialties

Product leadership: +1.1%; AI/ML: +0.7%. Other four specialty medians declined.

+1.1%

PRODUCT LEADERSHIP

INTERPRETATION These results describe observed salary patterns, not individual raises or employer hiring demand.

Source: aijobs.net / CMU snapshot (Aug. 3, 2025); exact-deduplicated sample. 2025 covers part of the year.

Why Walmart Global Tech is worth approaching

TECHNOLOGY INVESTMENT & TALENT NEEDS

- Walmart Global Tech continues investing in AI, automation, and digital platforms to support its global retail operations.
- Specialized technical leadership represents a potential area for long-term recruiting opportunities.

WHERE LIBECCIO ADDS VALUE

- Walmart has an established internal recruiting team, but external specialists could complement its efforts on narrowly targeted leadership searches.
- Libeccio would focus on identifying experienced Data Engineering & Architecture candidates beyond conventional applicant pipelines.

POTENTIAL ANCHOR-CLIENT PARTNERSHIP

- Walmart identifies data engineering as a critical function supporting its data infrastructure, digital experiences, and AI capabilities.
- A successful initial engagement could establish credibility and create opportunities for repeat business.

What we would do before committing to a Walmart search

01 Identify Recruiting Opportunities

Engage Walmart Global Tech's talent acquisition team to identify specialized leadership vacancies, hiring challenges, and opportunities for external recruiting support.

02 Demonstrate Our Competitive Advantage

Develop a targeted pipeline of experienced Data Engineering & Architecture candidates across major technology hubs, accounting for compensation and relocation expectations.

03 Establish a Long-Term Partnership

Propose a limited initial search with measurable hiring outcomes. Use a successful placement to build credibility and pursue additional recruiting engagements.

Appendix

Role-family representation in the analytic sample

Share of exact-deduplicated records with a classified role family.

Source: aijobs.net salary survey (Aug 3, 2025). Exact duplicates removed; unclassified titles excluded.

CHART NOTE

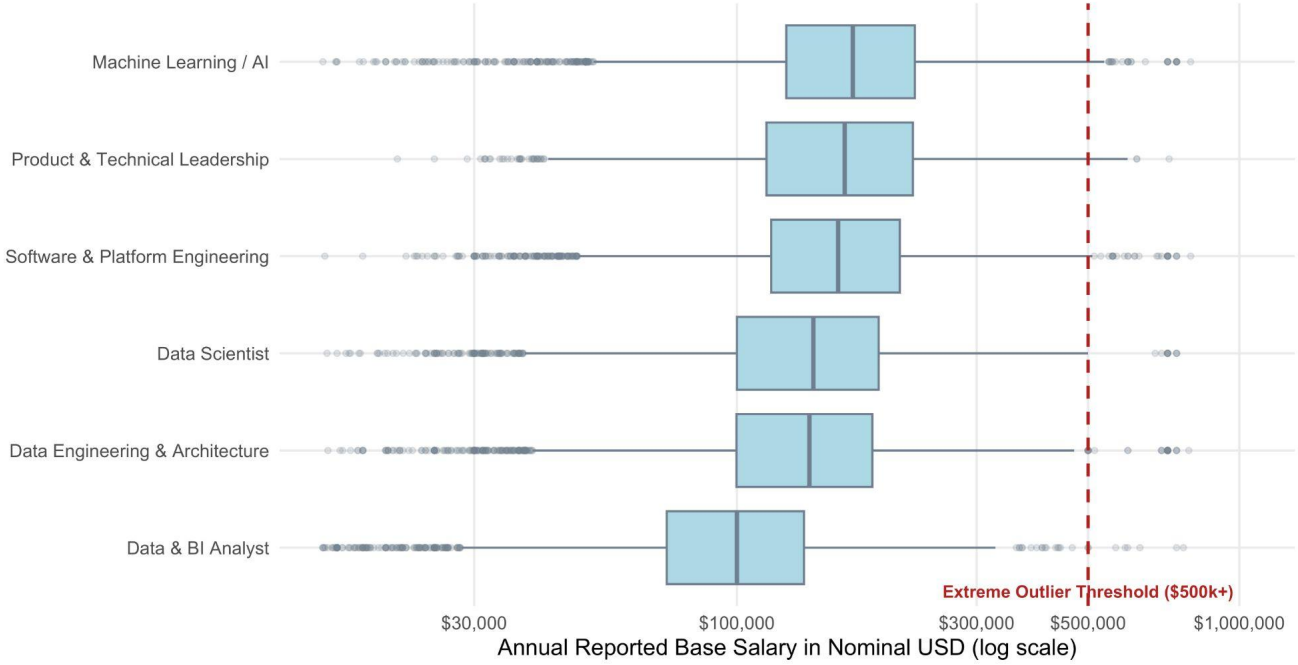

ROLE FAMILIES

The chart shows the mix of classified job records. The role-family comparisons apply only to records assigned to a defined specialty.

Appendix

High-Tier Compensation Variance and Extreme Outliers Across Role Domains

Log10 scale boxplots isolating extreme compensation outliers (≥ $500,000 threshold).

Source: aijobs.net salary snapshot (Aug 3, 2025). Deduplicated analytic sample.

CHART NOTE

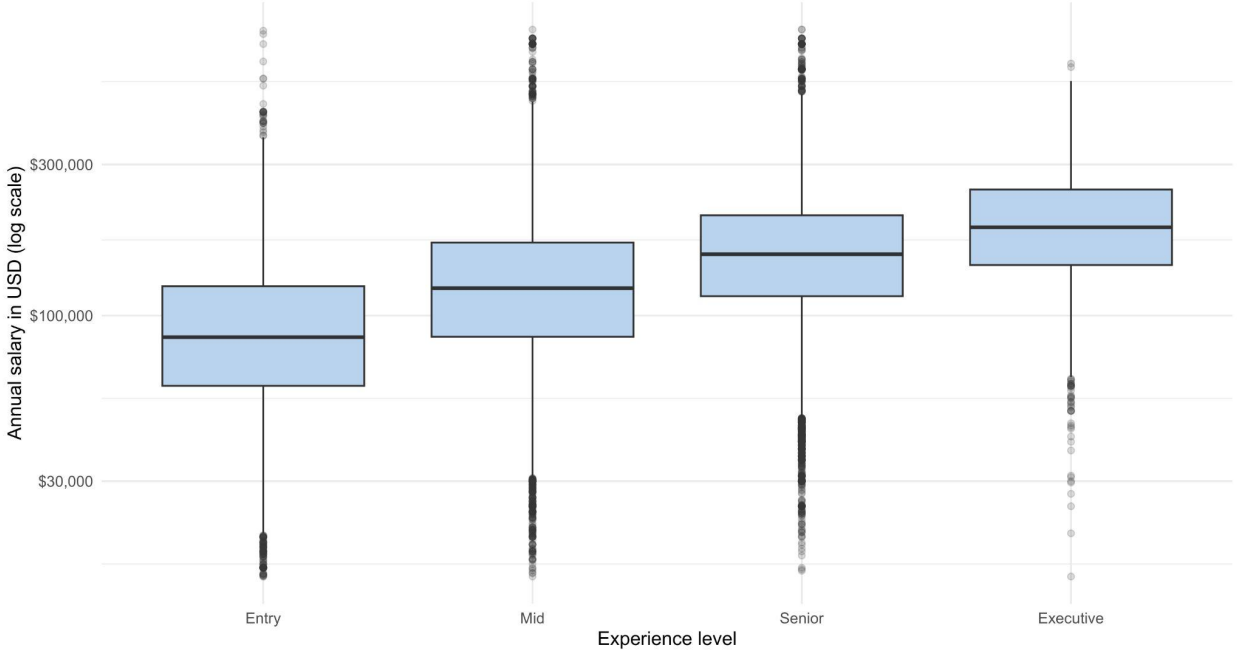

EXTREME OUTLIERS

The dashed line marks $500,000. The log scale displays typical pay ranges alongside unusually high reported salaries.

Appendix

Reported salary rises across experience tiers after exact de-duplication

Unique exact records only; n = 71,913. Salary is annual nominal USD, not total compensation or cost-of-living adjusted.

Source: aijobs.net global salary survey snapshot (Aug 3, 2025). Exact duplicates removed.

Source: Team 4, Enhancing Walmart's Future Technology Leadership (2026), based on aijobs.net dataset (Aug. 3, 2025).

CHART NOTE

EXPERIENCE AND PAY

The median reported salary increases by experience level. Each box reflects salary variation within a separate employee group.

Appendix

Salary gains between adjacent career tiers vary substantially by role

Percentage and dollar differences between adjacent median salary levels.

Source: aijobs.net salary survey (Aug 3, 2025). Compares separate experience groups, not longitudinal raises.

CHART NOTE

CAREER-TIER DIFFERENCES

Differences between adjacent median salary levels vary by specialty; these are not individual employee raises.
